About Dr. Spyros Botos, DDS, MSD
Dr. Spyros Botos graduated from the Dental School of Athens in 2000. For the next two years he served as Clinical

vs. screw-in prostheses are also presented. Learn how to select the correct abutment for each case based on design and prosthetic options. This course will include several comprehensive case studies demonstrating implant protection during occlusion considerations.

The basic Prosthetic Course will compare the prosthetic options for fixed and removable prostheses in implant dentistry. We will understand the advantages and disadvantages of the different methods to provide fixed and removable implant prostheses to patients, by appreciating and applying all the occlusal concepts to implant fixed and removable restorations. Learn the step by step approach to fabricate an implant prosthesis using the direct or indirect techniques, and perform them on laboratory models.
